

Metal Forming Systems

Custom-Built to Your Specifications

- Each metal forming system is a custom-built innovation, designed to interface with the specific requirements of each customer
- Easily convertible for different sizes, typically accepting full-width coil or scrolled sheet, either steel or aluminum
- Programmable Logic Controls are an integral part of each custom system
- All tooling is designed for consistent product repeatability and maximum life

OVER A HALF CENTURY OF EXPERIENCE

RAM Innovative Technologies has been a forerunner in close-tolerance precision specialty machining and design for over a half-century. Our international reputation for quality in the global container industry is rooted in a unique blend of experience and know-how, integrating state-of-the-art technologies, cost-effective production and a concentration on customer satisfaction that consistently results in repeat business.

Our partnership with Quality Machine and Repair has created a collaboration that provides our customers with the benefits of each company's expertise and specialized resources. The result is advanced precision technologies and innovative engineering designs — the perfect marriage of detailed tooling with cutting-edge 2-piece container technology.

Experience from the past, a commitment to the present, and our vision for the future combine to make us the best choice for all your two-piece metal forming requirements.
